A great technical support online training from an accredited institute is also available for AutoCAD. It is a must for every designer and developer who wants to learn AutoCAD and make it their career. What is AutoCAD? AutoCAD is a type of CAD software used by architects, mechanical engineers, electronic engineers, and other types of engineers, and is a well-known product in the CAD/CAM space. AutoCAD offers two types of licenses: perpetual and annual. As a perpetual license holder, you have the right to use the software for life and it continues to function even after its end-of-life. Though the perpetual license is effective for life, it expires at the time of the license renewal after 5 years. A renewal is required even if the software is never used or only used occasionally. The annual license, on the other hand, works like a license that is issued for the duration of a year. This license can be renewed annually for the same duration. These licenses are available in annual and monthly terms. A subscription generally runs between one and three years and can be renewed for up to four years. Subscription to AutoCAD is for personal use only. After the license expires, the license holder needs to purchase a license for life. If the license is for the perpetual license, then the perpetual license holder will be required to purchase a new license for life after the life license expires. If the license is for an annual license, then the license holder will not be required to purchase a new license for life after the annual license expires. If you want to continue using the software after the license expires, you will be required to pay a fee in the same way as if you were purchasing a new license. Every license comes with the following features: Let's look at the difference between the perpetual and annual license options. AutoCAD Perpetual License The AutoCAD perpetual license option is available for a single user and lasts for life. It costs $750 to get the license for one year and $4,000 for five years. The AutoCAD perpetual license has five main components: AutoCAD Key Code : a unique alphanumeric key generated during installation of the product : a unique alphanumeric key generated during installation of the product AutoCAD User Name : the user name that will be used to identify
