The world of Amelie is governed by the recently deceased King Alduin. A land that is ruled by superstition. Some people pray, others wonder in silence and others fear that Alduin is crying in darkness. Players follow a story that is divided into four main chapters. The narrative is part interactive story and part world building, that continuously changes by tasking players and allowing them to experience a variety of settings. Tuna is not a fish that's overly fond of playing with the kids, but a sweet little gent named Tuna will give a dolphin a run for their money as the new star of Pokémon Go. This quirky little guy is to get his own plush toy in the near future and can be your avatar on a variety of digital platforms, so you should probably get out there and catch your own! First impressions I found the plush (or should I say Tuna) to be soft, and the design is okay, with the pretty rad logo on the front. As far as the Pokémon go aspect of the plush goes, I honestly didn't know what to expect. However, it is pretty easy to see where you can use your plush to catch (or "fetch") Pokémon. As you walk around your city you will catch Pokémon and the point where you are collecting them corresponds to your plush little buddy. It's cool and I don't know about you guys but this design will make it pretty easy to find your stuffed friend on the streets! I like The plush is pretty cute. It's soft and floppy and I can't help but imagine myself cuddling up to it as I read this article. I also love that you can pair your plush with your phone to show off how many Pokémon you've caught and how happy you are! I don't like There isn't much to dislike about this toy, but I would have liked to have seen some other options other than a fish. You could have made it a turtle, otter or just a ball of yarn, but you went with a fish. That's fine I guess but I don't know if I would choose the fish as my avatar for Niantic. Recommendation If you like Tuna you'll like this plush. It's not my favorite of the stuffed animal assortment that are
