## **Elden Ring Features Key:**

FREE TO PLAY: No level cap! You can continue developing your character as far as you like, as the chart below shows.

SYSTEMIC STRUCTURE AND CHARACTER DEVELOPMENT Utilizing the Strategic Mechanics system that was released with Elden Ring, you will develop your character while you compete in battle with other players. Complete a variety of missions as you advance in rank, and then determine your own progression in battle and strategy.

MULTIPLAYER ARENA AND BATTLE BOSSES You can either directly connect to other players and battle by using a PvP mode or instead control your own powerful character and participate in the Theater of Elden Rnidinngs, where you directly battle multi-level bosses. You can even play as Tarnished and battle AI-controlled characters!

## **Theater of Elden Rnidinngs**

New characters can play the Theater of Elden Rnidinngs, where they first have to deal with the boss, the White Argyle (Elden Ring Story Ver02), and then defeat the Magocrat Parida (Elden Ring Story Ver03). Losing causes the character to drop their Maelstrom yet they can still fight and have to re-enter the Ring if they did not obtain a new Maelstrom. If a player is unsuccessful at the theater, their character will not leave the theater.

Each time you fight a boss in the Theater of Elden Rnidinngs you will be able to acquire a special battle treasure. You can view these when the character is in battle or, as a preview, before you enter the theater.

## **Item Bestiary**

Each enemy has their attack animation that you can rewind by pressing H.
