In addition to these significant upgrades across Photoshop, Adobe also announced new and innovative features for Creative Cloud subscribers worldwide, with the latest in the Adobe Stock creative community. Adobe Sensei-powered Photoshop filters will give users complete access to a world of realism with a new way to instantly change the direction of a person's gaze in seconds. As found in apps like Google Goggles, this feature uses an intelligent algorithm that enables users to detect and recognize high-fidelity 3D models in any image. When serendipity strikes, users following the model's gaze can zoom in to catch the moment at even greater resolution. Illustrator CC 2021, also announced today, is designed to make drawing and editing simple, intuitive and collaborative through a new visual experience. Illustrator integrates code writing tools, a redesigned UI and new importing and exporting capabilities, plus much more, to encourage experimentation, collaboration and a faster pace of work. Adobe also debuted a new lineup of artwork services via Adobe Stock. This includes the first subscription-based subscription service for high-quality prints, posters and canvas through Adobe Stock, and software access to premium design and video templates. The Adobe Stock UK team has also upgraded its quality assurance services to better help customers navigate the world of stock imagery. Over time, this new investment will help enable customers to license stock imaging in even more ways than before. As part of this new high-res, high-quality investment, Adobe Stock will also be available in Japanese, French, German, Spanish, Italian, Korean, and Brazilian Portuguese.
